## Theory of Automata

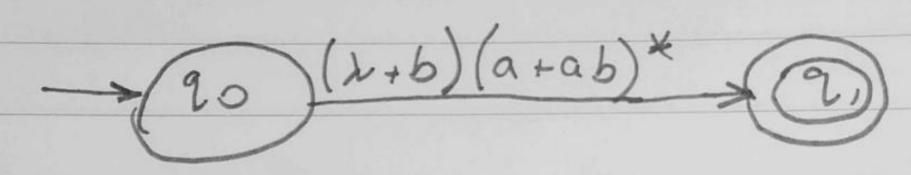

Assignment 1

Q1) RE for language where b is never tripled over a'phabet P= {a,b}

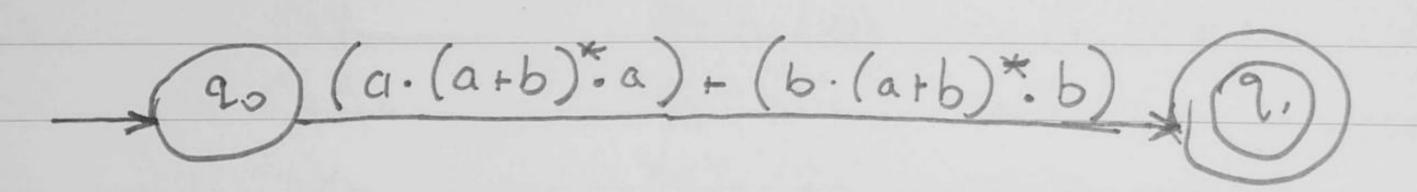

Ans 1) (2+6+66). (a+ab+abb)\*

Q2) Consider the Language L of strings defined over \( \zerightarrow \{ \text{2} = \{a,b\}\} \), construct GTG

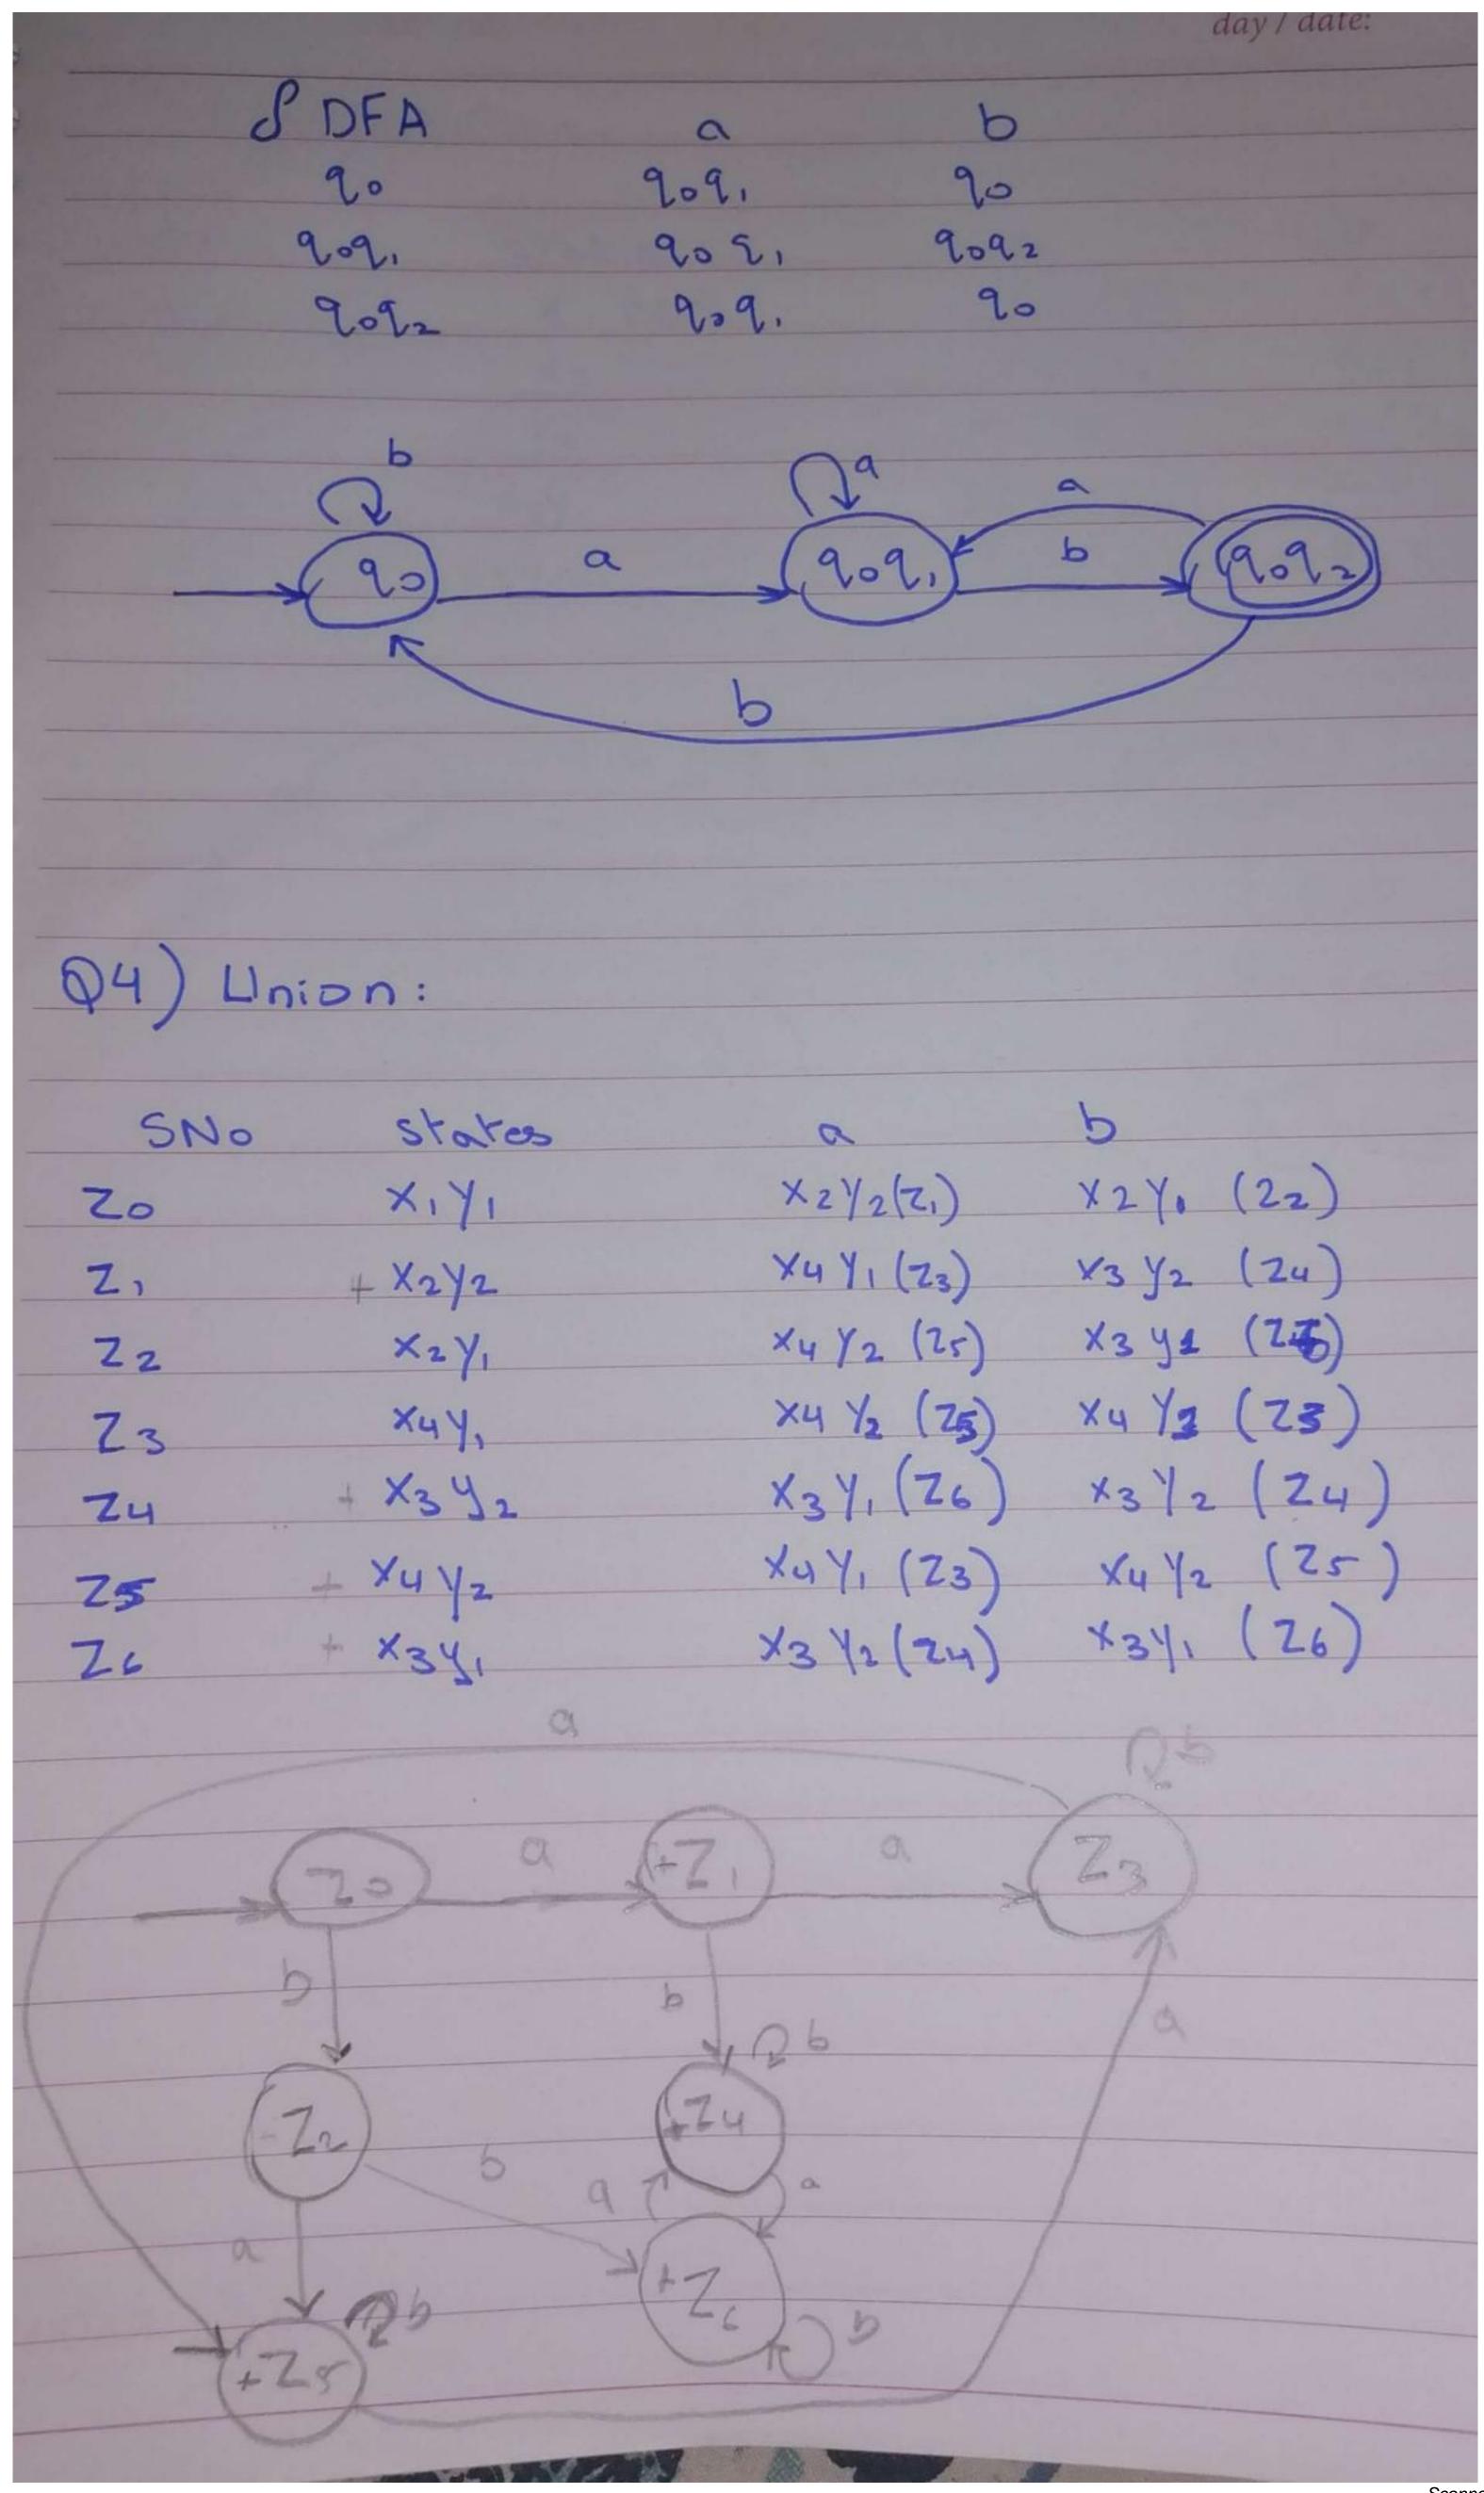

a) Strings with double b:

b) accepts all strings beginning and ending with same letters

D3) SNFA	a	6
90	9091	2 D
9.09,	909,	9,92
2092	9021	90
